Describe Cause of Problem and Remedial Action Taken.* <input type="checkbox"/> An XTO employee discovered a release on location. After investigation it was discovered that a gas eliminator valve on the water line had froze and broke. Approximately 20 barrels of produced water was released. The release was contained and no produced water left location. The ground was frozen allowing for no or very little absorption into the ground. A vac truck was dispatched and recovered approximately 20 barrels.		
Describe Area Affected and Cleanup Action Taken.* <input type="checkbox"/> The water was contained within secondary containment, no water left location. The valve was replaced and a vac truck was dispatched immediately. Vac truck recovered approximately 20 barrels of produced water.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
