By Whom? Monica D. Johnson Was a Watercourse Reached?						Date and Hour – 3/27/07 – 2:00 p.m. If YES, Volume Impacting the Watercourse.					
Yes No						ii i ii i	me impacting the	Watercours	.		
If a Watercourse was Impacted, Describe Fully.*											
Describe Cause of Problem and Remedial Action Taken.* A contract tank gauger discovered a condensate spill of an estimated 10											
BBL at the Quinn #4A on 3/23/07, due to the pit tank running over into the plastic-lined cribbing. All spilled fluids											
remained within the bermed area and 10 BBL were recovered from the lined cribbing around the pit tank.											
									•		
Describe Area Affected and Cleanup Action Taken.* All spilled fluids remained within the bermed area and all 10 BBL were											
recovered from the lined cribbing around the pit tank. No further remediation is necessary, as all fluids were spilled											
to a liner and were recoverable.											
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and											
regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger											
public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability											
should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health											
or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
