If a Watercourse was Impacted, Describe Fully *					
NA					

RCVD JUN11'07

Describe Cause of Problem and Remedial Action Taken.*	OIL CONS. DIV. DIST. 3
An apparent hole in the condensate tank allowed the condensate leak out into the bermed area.	

Describe Area Affected and Cleanup Action Taken.*
All fluids were contained inside the bermed area. A vacuum truck was able to recover all the free standing fluids. The impacted soils will be raked to promote natural remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
