Describe Cause of Problem and Remedial Action Taken.*

One inch manual dump valves on the suction scrubbers on the two compressors were found open allowing produced gas to vent to the atmosphere. Based on volume trends, it appears that the valves were open for 4 hours. The release was discovered on Monday (1/8) at 2:30 pm and the valves were shut.

Describe Area Affected and Cleanup Action Taken *

The gas was vented to the atmosphere.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
