NATURE OF RELEASE

Type of Release Produced Oil	Volume of Release Approx 10 bbl	Volume Recovered Approx 10 bbl
Source of Release Drain valve on production pit	Date and Hour of Occurrence 12/07/06, time unknown	Date and Hour of Discovery 12/07/06 at 1:00 pm
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse	
If a Watercourse was Impacted, Describe Fully * N/A		

Describe Cause of Problem and Remedial Action Taken * ☐ During transfer from a frac tank to a production tank a drain valve was left open. **Produced oil spilled into the containment cellar. The release was contained within the cellar.**

Describe Area Affected and Cleanup Action Taken * ☐ There did not appear to be lateral migration of the spill. The spill was detected promptly and a vacuum truck immediately recovered the oil within the cellar walls. Quick response resulted in recovery of oil and approximately 10 yards of impacted soil was excavated and hauled to land farm.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
