Describe Cause of Problem and Remedial Action Taken. (Attach Additional Sheets If Necessary)

The float for the evaporator stuck so the evaporator did not kick on. The produced water storage tank overflowed into the bermed area.

Describe Area Affected and Cleanup Action Taken. (Attach Additional Sheets If Necessary)

The coal seam produced water was contained inside the bermed area. A vacuum truck recovered approximately 60 bbls of water.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
