Describe Cause of Problem and Remedial Action Taken.\*

The drain valve on the 286 bbl oil tank froze and broke allowing the contents of the oil tank to leak into the bermed area. The valve was replaced. Vacuum trucks were used to recover the free standing fluid and put it back into the tank.

Describe Area Affected and Cleanup Action Taken.\*

All fluid was contained inside the tank berm. The impacted soils will be excavated.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations
