Latitude 36.75938° Longitude 107.44467°

NATURE OF RELEASE

Type of Release – Produced water	Volume of Release – 90 BBL	Volume Recovered - 89.5 BBL
Source of Release Produced water tank overflow	Date and Hour of Occurrence Between 1/14 and 1/26/05	Date and Hour of Discovery 1/26/05 – 10:30 a.m.
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Denny Foust – OCD – via email	
By Whom? Monica Olson	Date and Hour – 1/27/05 – 12:45 p.m.	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* A produced water spill was discovered on the morning of 1/26/05. The spill resulted from a 500 BBL produced water tank overflowing and running over. All fluids remained within the bermed area around the tank. The spill was first estimated to be 20 BBL based on calculations from the pumping unit's speed and size, and last water tank gauge. However, a vacuum truck was called to pull the tank contents and the fluids standing in the berm and pulled approximately 119 BBL water from the berm with 1 BBL produced / fresh water being unrecoverable due to being spread out across the bermed area. With recent rains and looking at nearby wellsites and rainwater accumulation in the berms, it is further estimated that approximately 90 BBL of the fluid was produced water and 30 BBL was fresh rain water.

Describe Area Affected and Cleanup Action Taken.* All fluids remained within the bermed area around the tank. A vacuum truck was called to pull the fluids standing in the berm and pulled approximately 119 BBL (produced water and fresh rain water) from the berm with 1 BBL produced / fresh water being unrecoverable due to being spread out across the bermed area. No further remediation will be done. This is the initial and final report.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
