NATURE OF RELEASE

Type of Release - Produced water	Volume of Release - 10 BBL	Volume Recovered - none
Source of Release. Leak in condensate tank	Date and Hour of Occurrence 1/25/05	Date and Hour of Discovery 1/26/05 - 1:00 p.m.
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Denny Foust - OCD - via email Mark Kelly - BLM - via email	
By Whom? Monica Olson	Date and Hour - 1/26/05 - 3:30 p.m.	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* A produced water spill of approximately 10 BBL was discovered on the afternoon of 1/26/05. The spill resulted from a pinhole leak in the condensate tank. There was water in the bottom of the condensate tank, and about 6 inches of water was calculated as missing (10 BBL). There were no standing fluids around the tank, so it is assumed that the spilled produced water soaked in to the ground. The well was shut in. Giant was called to pull the contents of the condensate tank in preparation for repairing / removing the tank.

Describe Area Affected and Cleanup Action Taken.* There were no standing fluids around the tank, so it is assumed that the spilled produced water soaked in to the ground. Work is planned to clean and repair the tank or replace with a new one, if required. At this time, the area directly under and around the tank will be sampled to determine if the soil has been impacted. If necessary, the soil will be excavated and hauled to the Envirotech landfarm for remediation, with clean soil being used for backfill. Unless the investigation and remediation shows further soil impacts, this will be the final report.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
