If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.

Pumper was gauging tank and discovered that all produced condensate had leaked out of the production tank through a hole near the bottom of the tank. Tank will be replaced.

Describe Area Affected and Cleanup Action Taken.*

Metal containment tank leaked contents into the SPCC containment berm. The sand inside of the berm absorbed the condensate. Soil will be excavated by Envirotech and land-farmed on site. Clean soil will be brought in to fill excavation. Land-farmed soil will be remediated and reused on site. Samples of the location will be taken to assure that all impacted soil are removed and remediated.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
