If a Watercourse was Impacted, Describe Fully.* NA					
Describe Cause of Problem and Remedial Action Taken.* A small corrosion hole in the bottom of the condensate storage tank allowed fluids to escape into the bermed area. Based up gage reports, it is estimated that 2 bbls of produced water and 8 bbls of condensate were lost.					
Describe Area Affected and Cleanup Action Taken.* All fluids were contained inside the bermed area. The impacted soils will be excavated and landfarmed on the same lease. The tank has been taken out of service and will be repaired or scrapped.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
