If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* Tech arrived on location and discovered that there was a leak from the water dump valve on the separator. The fire on the separator burner had gone out and there had been a freeze on separator and water dump line, causing the water dump valve to break. All of the water stayed on location in the immediate area of the separator.

Describe Area Affected and Cleanup Action Taken.\*

This well has a ranking of 0. Depth to groundwater is > 100', distance to a water source is greater than 1000' and the distance to a surface water body is > 1000' horizontal feet. We feel that this is best left in place at this time.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
