Describe Cause of Problem and Remedial Action Taken.*

A storage tank that was used to store water after running through an RO Unit leaked approximately 5 bbls onto the ground. Lab analysis of the water showed total dissolved solids at less than 200 ppm.

Describe Area Affected and Cleanup Action Taken.*

All released water was contained on location. The soils were worked with a backhoe to facilitate the drying of the area.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations
