Describe Cause of Problem and Remedial Action Taken * <input type="checkbox"/> A lease operator responded to a call out page at the location when they found the tank battery overflowing into the berm. Upon investigating it was discovered that the high level alarm in the automation malfunctioned which prevented the injection pumps to start up when they should have. Two vac trucks were immediately dispatched to the location and all notifications were made.		
Describe Area Affected and Cleanup Action Taken * Two vac trucks were used to recover approximately 440 barrels of water from the berm on location. Automation was notified and the automation problem was corrected.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations
