13. Describe Proposed or Completed Operations

Coulthurst plugged and abandoned this well on January 18, 2010 per the following:

MOL and rig up cementing equipment; run in the well with 100' of 1-1/4" poly pipe; establish circulation with 2 bbls of water; calculated initial fluid level at 126'. Mix and pump 16 sxs Class B cement (18.8 cf, 15.6 ppg) to fill the inside of the 4.5" casing with cement, circulate good cement to the surface. Pull out of the well with the poly pipe. Cut off the 4.5" wellhead and attempt to run in the annulus with the poly pipe; only able to get down to 8' from the surface; the 4.5" x 7" annulus filled with dirt / shale due to the wellhead valve being below ground level. Fill the bradenhead annulus with 4 sxs Class B cement and then installed the p&a marker.

14. I hereby certify that the foregoing is true and correct.
