NATURE OF RELEASE

Type of Release: Oil Spill	Volume of Release: 100 bbls	Volume Recovered: 35 bbls
Source of Release: Oil Storage Tank	Date and Hour of Occurrence: 12/14/07	Date and Hour of Discovery: 8:00 am 12/14/2007
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Jicarilla EPO - Cordell Tecube, NMOCD - Henry Villanueva, BLM - Mark Kelly (message)	
By Whom? Ed Hasely	Date and Hour 12/14/2007 2:30 pm	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. NA RCVD JAN 10 '08	

If a Watercourse was Impacted, Describe Fully.* NA

**OIL CONS. DIV.
DIST. 3**

Describe Cause of Problem and Remedial Action Taken.*

A hole in the oil storage tank near the bottom allowed the oil to leak out into the bermed area. The hole was plugged and the remaining contents of the tank were removed to prevent further leakage. A vacuum truck was used to recover the free standing liquids. All fluids were contained inside the bermed area.

Describe Area Affected and Cleanup Action Taken.* The oil tank and pit tank were moved so that the soil beneath the equipment can be removed. Impacted soils were excavated and are being transported to a commercial disposal facility. Samples were collected from the excavation and sent to a laboratory for analysis. The samples are below the 100 ppm TPH, so backfilling the excavation with clean soils has begun. Plans are to replace the existing oil storage tank. NOTE: A final report will be submitted with the lab analyses and final volumes.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Re: **Chacon Jicarilla D #6**
Initial Release Report Submittal

Dear Sirs:

Enclosed is an initial Release Notification and Corrective Action (C-141) Form for the recent release on the Chacon Jicarilla D #6. The release was verbally reported to the Jicarilla EPO, the Farmington BLM, and the New Mexico OCD on the day of the incident. The excavation of impacted soils has been completed, but the hauling off of these soils and the backfilling is still in progress. I will follow-up with a final report once the job is complete. The final report will include the lab analyses and the volume of impacted soils that were removed.

If there are any questions or concerns with this submittal, please contact me at 505-324-4131.

Sincerely,

A handwritten signature in black ink, appearing to read "Ed Hasely".
