Describe Cause of Problem and Remedial Action Taken \*

Oil theft. Sales valve was left slightly open after the theft of oil. The area impacted was excavated to NMOCD clean up standards. See laboratory data attached. Excavated soils were landfarmed on an adjacent location Fogelson I. Approximately 50 cu yds of soil was removed. Clean soil was placed in the excavation.

Describe Area Affected and Cleanup Action Taken \*

Area impacted was all within the berm containment of the production storage tank. Additional historic contamination was discovered and was removed at the same time as the spill remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
