Recommended Allocation for Commingles

Well: Huron #4C

30-day average production based on December, 2003 production (see attached decline curves)

G	Zone	Average MCFD	Percentage of total flow
а	MV	180	43%
s	DK	236	57%
1	Total	416	100%

0	Zone	Average BOPD	Percentage of total flow
i	MV	0	0%
1	DK	2.99	100%
	Total	2.99	100%

Recommended allocation for future downhole commingled production

Zone	Gas	Oil
MV	43%	0%
DK	57%	100%
Total	100%	100%

Statement of Commingling

The commingling of the Basin Dakota and Blanco Mesa Verde pools in this wellbore will not reduce the value of the remaining production. Commingling these pools should increase the value of the remaining reserves due to using the remaining reservoir energy in both zones to produce the well.

Commingling operations conducted on other similar wells have resulted in increased production rates and greater reserve than producing the zones separately.

Statement of Notification

No notification is required for this well (Huron #4C); the interested parties in these two pools are identical.

A copy of this application has been forward to the Bureau of Land Management.

Bill Marquis

Sr. Landman

Robert W. Ovitz
