13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompletable horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Texakoma hereby requests cancellation of previously approved plugging and now proposes to recomplete the well to the Fruitland Coal which is present in the well-bore. Attached are well-bore schematics showing the Fruitland Sand perforations that are now open and another schematic showing the plan to frac the Fruitland Coal by isolating the existing perts with a packer and fracturing the Fruitland Coal perts below (2030'-2046') down tubing as indicated. Upon completion the Fruitland Coal would flow up the tubing and if it had to be pumped the Coal would be commingled with the Fruitland Sand and stay pumped off so that no cross-flow developed. A commingling permit would be filed with the OCD-NM at that time, Work will be scheduled in 60-90 days.

14. I hereby certify that the foregoing is true and correct
