13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy intends to conduct the following workover operations on the Breech C 244. The Mancos interval fr/6,605' - 6,800' will be re-stimulated down tubing with XL gel foam carrying sand. The Mesaverde interval will be perforated fr/5,303' - 5,456' (select fire, .034" dia, 21 holes). This zone will be stimulated down tubing with XL gel foam carrying sand. The Dakota, Mancos and Mesaverde zones will then be downhole commingled and returned to production as a DK/MC/MV well.
