Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This well is capable of production. Due to H₂S levels exceeding pipeline specifications, Enterprise has required us to shut the well in. Historically, this well has never produced H₂S. This well was worked over in 2008, and prior to moving to this location, the rig had been on a well producing H₂S. It is believed that the downhole tools used previously had introduced a small amount of H₂S into this wellbore. Weather permitting, Enterprise will retest for H₂S on December 20, 2010. If the levels are back to normal, we will return the well to production. If not, we will evaluate the well for any remaining potential, and if none exists, we will submit our plans for plugging and abandonment by January 15, 2011.
