13. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Devon proposes to complete and test the Encinal and Burro Canyon intervals of the lower DK. The zones will be perforated and flow tested prior to making a decision on the stimulation. We propose to perforate the Burro Canyon from 7865' - 7877', and continue to produce the well to evaluate for production and stimulation. After this evaluation is complete we propose to perforate the Encinal interval from 7806' - 7842'. We will continue to produce the well to evaluate for production and stimulation.

14. I hereby certify that the foregoing is true and correct.
