13. Describe Proposed or Completed Operations

It is intended to remove the packer on the dual well and commingle the production from the Basin Fruitland Coal (pool 71629) and the Aztec Pictured Cliffs (71280). The production will be commingled according to Oil Conservation Division Order Number 11363. Allocation and methodology will be provided after the well is completed. Commingling will not reduce the value of the production.

Proposed perforations are: FC - 2542' - 2999' ; PC - 3001' - 3114' These perforations are in TVD.

Interest is common, no notification is necessary.

BR will use some form of the subtraction method to establish an allocation for commingled wells.

14. I hereby certify that the foregoing is true and correct.
