If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* A spill of at least 80 BBL of produced water was discovered at the FC State Com #4A on 12/20/05, when a 2" Balon valve froze and burst inside the water transfer pump building. All spilled fluids remained within the bermed area.

Describe Area Affected and Cleanup Action Taken.* All spilled fluids remained within the bermed area and 80 BBL were recovered by vacuum truck. An investigation will be conducted to determine how deep produced water penetrated into the soil, if any. If the investigation shows remediation is required, stained soils will be excavated and hauled to Envirotech and the excavated area will be backfilled with clean fill dirt.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
