NATURE OF RELEASE

Type of Release	OIL	Volume of Release	80 bbls	Volume Recovered	70 bbls
Source of Release	Broken valve	Date and Hour of Occurrence	12-27-04 10:00 am	Date and Hour of Discovery	12-27-04 10:00 am
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Denny Foust - NMOCD - 1:00 pm K. C. Manwell - Jicarilla EPO - left message - 1:00 pm David Woolf - Apache Corporation EH&S Department - 10:00 am			
By Whom?	Bonita Knight - Production Clerk III	Date and Hour	12-27-04 10:00 am		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

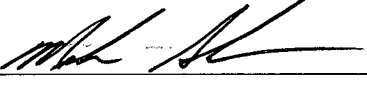

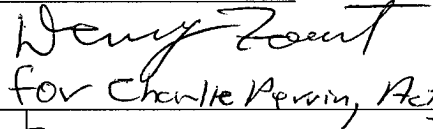

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* BS&W valve on the oil tank froze and broke. Dumping 80 bbls oil into the firewall. Spill was contained inside firewall. A new valve was installed on the tank. A water truck vacuumed up 70 bbls of oil and put back in the tank. Resulting in 10 bbls not recovered. The oily dirt will be excavated and hauled off to Schmitz Landfarm.

Describe Area Affected and Cleanup Action Taken.*

1.) Removed top rail, fence, and fence post on west, south and east side of tank battery. 2.) Removed the outer two-thirds of the west, south and east firewall soil (soil not contaminated). 3.) Excavated the east side of tanks to a depth of 12 inches below ground level, took PID reading at this depth, reading showed > 100 ppm. 4.) Excavated the south side of tanks to a depth of 24 inches below ground level, took PID readings at this depth, readings showed > 100 ppm. 5.) Excavated the west side of tanks to a depth of 10 inches below ground level, took PID readings at this depth, readings showed > 100 ppm. 6.) Excavated the north side of tanks to a depth of 10 inches below ground level, took PID readings at this depth, readings showed > 100 ppm. 7.) Excavated the area between the two tanks to a depth of 10 inches to 12 inches below ground level, took PID readings at this depth, readings showed > 100 ppm. 8.) Did not remove north side firewall, no contamination found. 9.) Total estimated soil removed is 30 yards. 10.) Replaced all contaminated soil with clean soil obtained on site. 11.) Rebuilt all firewalls around tanks to SPCC specs. 12.) Rebuilt all fence around tank battery. 13.) Contaminated soil was hauled to T-N-T land farms. (ESTIMATED A TOTAL OF 30 YARDS SOIL)

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
