If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

**Pumper discovered water in the production tank berm. The leak was a result of water leaking through sales valve on the tank, and getting trapped between sales valve and closed load line valve. Water froze, cracked load the line, and slowly leaked into bermed area.**

Describe Area Affected and Cleanup Action Taken.\*

**Water truck called, recovering remaining fluid from tank. The soil was landfarmed on the location.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
