NATURE OF RELEASE

Type of Release: Condensate Storage Tank Leak	Volume of Release: 93 BBLS.	Volume Recovered : None
Source of Release: 210 BBI site storage tank	Date and Hour of Occurrence: Between 6/19 and 6/25/2003	Date and Hour of Discovery: 6/25/2003
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? D. Foust	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

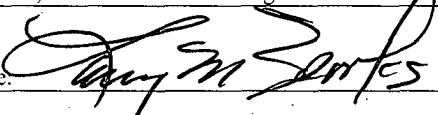

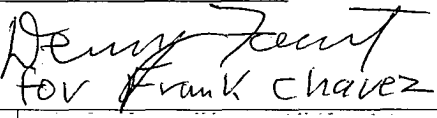

The cause is identified as a "probable theft with no available physical evidence". The original volume loss was believed to be theft related. The BLM law enforcement officers were notified. Subsequent investigations revealed a suspected tank leak but the tank was pressure tested and revealed no leak origin.

Remedial action taken was to isolate the tank from further production and remove existing fluid volumes from the tank to prevent further release.

Describe Area Affected and Cleanup Action Taken.*

- 1) Clean-up action will include cleaning and inspection of the tank and re-installation of the tank with adequate leak detection.
- 2) Excavate and remove contaminated soils and perform necessary remedial action for the affected areas. A 20X20X20 foot excavation was performed to evaluate the extent of the existing contamination on the well site. The soil at the bottom of the excavation still displayed evidence of hydrocarbon contamination. The excavation activity was suspended for safety reasons and removed spoil is being "land-farm" processed and the bottom of the excavation is being treated for the contamination with plans to core-sample in the future to evaluate treatment effectiveness.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
