If a Watercourse was Impacted, Describe Fully.*
None impacted

Describe Cause of Problem and Remedial Action Taken.*
High level tank alarm did not call out to lease operator. Produced water tank was over filled. Excess water was contained within gravel lined area and berm and drained into open top water collection tank. 10 cu yds of impacted soil and gravel were removed from tank battery area. Call out level switch was fixed and tested.

Describe Area Affected and Cleanup Action Taken.*
Area within tank battery bermed containment

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
