Was Immedia	ite Notice (If YES, To Whom? 26 03					
✓ Yes					Denny Foust – OCD – 5/9//04 via email					
D. Will Co. Marriag Olana					Mark Kelly – BLM – 5/₩/04 via email					
By Whom? Monica Olson Was a Watercourse Reached?						Date and Hour – 5/26/04 – 12:00 p.m. If YES, Volume Impacting the Watercourse. ",				
Was a Watercourse Reached? ☐ Yes ☒ No					in TES, volume impacting the watercourse.					
If a Watercourse was Impacted, Describe Fully.*										
Describe Cause of Problem and Remedial Action Taken.* An 8 BBL oil spill was discovered on 5/26/04. The spill resulted when										
someone shut the gas off to the oil valve, which then sent all the fluids to the separator, which flowed to the pit tank and the pit tank overflowed. All spilled fluids remained within the bermed area. A vacuum truck was called immediately, and 7 BBL oil was recovered from the bermed area.										
Describe Area Affected and Cleanup Action Taken.* No fluids left the bermed area. A vacuum truck was called immediately to recover the fluids standing within the berm. Remaining staining will be excavated and taken to Envirotech landfarm for remediation. Unless findings upon remediation prove otherwise, this will be the final report.										
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
