If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
Potential well construction subsurface problems. The exact problem is under investigation. A natural seep has not been ruled out. Water quality analysis of water is attached and shows trace amounts of hydrocarbons (TPH= 0.7 mg/l GRO and total BTEX 657 ug/l)

Describe Area Affected and Cleanup Action Taken.*
Small water seep flowing out of hillslope approximately 25 feet down the eastern slope of the location. The minor surface water flow travels down a natural contour away from location approximately 200 yds and dries up..

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
