Was a Watercourse Reached? ☐ Yes ☒ No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.*		
RCVD FEB 17 '10 OIL CONS. DIV. DIST. 3		
Describe Cause of Problem and Remedial Action Taken.*		
On February 10, 2010, Field Tech reported a gas release on the Vandewart A3A well location. Approximately 189MCF of natural gas was released. The piping under the PSV on the engine broke below the PSV and above the hammer union due to inadequate support. This well is shut-in waiting an evaluation and repairs.		
Describe Area Affected and Cleanup Action Taken.* Soil on location was impacted. The area will be remediated.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
