Describe Cause of Problem and Remedial Action Taken.\* **On January 5, 2010, it was discovered that the filter housing for the water transfer pump was leaking due to a freeze. Upon discovery, the valve going to the tank was shut in. Note #1: This spill was initially reported below the 25 BBL limit required for immediate notice. After further review of the spill, it was discovered from review of telemetry on the water tank that 57 BBLS were released. Once this was verified, immediate notice was given to Brandon Powell via voicemail & email on 1/15/10.**

Describe Area Affected and Cleanup Action Taken.\* **All fluid remained on location and within the berm. No fluids were recovered. COPC will assess the impacted area and remediate, if needed.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
