13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Please reference demand letter dated 1/28/03 (1/28/04)

This PC well is incapable of flow into the El Paso intermediate pressured Trunk 3A (120#). The said well flowline, combined with production from the GCU 361 Fruitland Sand well, cross over lateral 6B-13(30 psi) to tie-in to 3A.

It is BP's intent to discuss with El Paso (today 2/26/04) about re-routng the flowline from these wells into 6B-13 (30 psi) at the crossover point. This would allow lower gathering pressure for both wells without the addition of wellhead compression and re-establish production from the GCU 297.

BP's target for the line switches is 3rd quarter 2004.

14. I hereby certify that the foregoing is true and correct.

Electronic Submission #28316 verified by the BLM Well Information System  
For BP AMERICA PRODUCTION CO, sent to the Farmington  
Committed to AFMSS for processing by STEVE MASON on 02/26/2004 (04SXM1240SE)
