

Operator Noble Energy, Inc. Lease Name Rio Bravo

Well
No. 27-12

Location Of Well: Unit Letter L Sec 27-T Twp 31N Rge 13W API # 30-045-33982

	Name of Reservoir or Pool	Type of Prod. (Oil or Gas)	Method of Prod. (Flow or Art. Lift)	Prod. Medium (Tbg. Or Csg.)
Upper Completion	Fruitland Coal	Gas	Flow	Csg.
Lower Completion	Dakota	Gas	Flow	tubing

Pre-Flow Shut-In Pressure Data

Upper Completion	Hour, Date, Shut-In 04/21/11 2:00pm	Length of Time Shut-In 3days	SI Press. Psig 260	Stabilized? (Yes or No) Yes
Lower Completion	Hour, Date, Shut-In 04/21/11 2:00pm	Length of Time Shut-In 3days	SI Press. Psig 330	Stabilized? (Yes or No) Yes

Flow Test No. 1

Commenced at (hour, date)* 04/25/11 8:00 am				Zone producing (Upper or Lower): Lower	
Time (Hour, Date)	Lapsed Time Since*	Pressure		Prod. Zone Temp.	Remarks
		Upper Compl.	Lower Compl.		
04/25/11 8:00am	3days	260	330		
04/25/11 8:15am	15min	260	120	45	Line pressure is 54psig
04/25/11 8:30am	15min	260	65		
04/25/11 9:15am	30min	260	55	54	
04/25/11 10:15am	1hr	260	170	54	Well went to off cycle
04/26/11 11:15am	24hrs	260	40	48	Line pressure is 40psig

Production rate during test

Oil: 0 BOPD based on 0 Bbls. In Hrs. Grav. GOR

Gas: 71 MCFPD; Test thru (Orifice or Meter): meter

Mid-Test Shut-In Pressure Data

Upper Completion	Hour, Date, Shut-In 04/21/11 2:00 pm	Length of Time Shut-In 6 days	SI Press. Psig 260	Stabilized? (Yes or No) yes
Lower Completion	Hour, Date, Shut-In 04/26/11 12:00 pm	Length of Time Shut-In 20 hrs	SI Press. Psig 280	Stabilized? (Yes or No) yes

Northwest New Mexico Packer Leakage Test Instructions

1. A packer leakage test shall be commenced on each multiply completed well within seven days after actual completion of the well, and annually thereafter as prescribed by the order authorizing the multiple completion. Such tests shall also be commenced on all multiple completions within seven days following recompletion and/or chemical or fracture treatment, and whenever remedial work has been done on a well during which the packer or the tubing have been disturbed. Tests shall also be taken at any time that communication is suspected or when requested by the Division.

2. At least 72 hours prior to the commencement of any packer leakage test, the operator shall notify the Division in writing of the exact time the test is to be commenced. Offset operators shall also be so notified.

3. The packer leakage test shall commence when both zones of the dual completion are shut-in for pressure stabilization. Both zones shall remain shut-in until the well-head pressure in each has stabilized, provided however, that they need not remain shut-in more than seven days.

4. For Flow Test No. 1, one zone of the dual completion shall be produced at the normal rate of production while the other zone remains shut-in. Such test shall be continued for seven days in case of a gas well

and 24 hours in the case of an oil well. Note: if, on an initial packer leakage test, a gas well is being flowed to the atmosphere due to the lack of a pipeline connection the flow period shall be three hours.

5. Following completion of Flow Test No. 1, the well shall again be shut-in, in accordance with Paragraph 3 above.

6. Flow Test No. 2 shall be conducted even though no leak was indicated during Flow Test No. 1. Procedure for Flow Test No. 2 is to be the same as for Flow Test No. 1 except that the previously produced zone shall remain shut-in while the zone which was previously shut-in is produced.

7. Pressures for gas-zone tests must be measured on each zone with a deadweight pressure gauge at time intervals as follows: 3 hour tests: immediately prior to the beginning of each flow-period, at fifteen-minute intervals during the first hour thereof, and at hourly intervals thereafter, including one pressure measurement immediately prior to the beginning of each flow period, at least one time during each flow period (at approximately the midway point) and immediately prior to the conclusion of each flow period. Other pressures may be taken as desired, or may be requested on wells which have previously shown questionable test data.
