Albuquerque, New Mexico

Dear Sir:

Reference is made to your letter of September 26 pertaining to the drilling of your No. 1 Drought-Booth.

We are returning the bond form because the form does not contain the 40 acre description of the well on the face of the bond. Please return this bond to this office.

I am returning to you your form C-101 and the federal "Designation of Operator" form. Your form C-101 must have the name of the operator agreeing exactly with the name on the bond. When you have changed the forms so that they agree with the bond, please forward them to our Aztec Office at P.O. Box 697.

The federal "Designation of Operator" form is not required by this office and is a form to be used solely on federal wells.

In regard to your proposed unorthodox location, this is to advise that you are hereby granted permission to drill this well at the location 2145 feet from the East line and 2475 feet from the South line of Section 4, Township 15 North, Range 6 West, provided that you comply with the other provisions of this letter and that your proposed drilling program meets with the approval of our Aztec Office.

Very truly yours,

W. B. Macey
Secretary - Director
