

6. Location and type of water.

Water for drilling operations will be taken from water holes in Marcelina creek south of the well site. Trucks will haul water to the well. No water lines will be needed.

7. Methods of handling waste disposal.

Upon completion of the well, all waste material will be placed in the pit, covered over and buried. See map 2.

8. Location of camps.

There will be no camp. Crews will travel daily back and forth to Grants, New Mexico.

9. Location of airstrips.

No airstrip will be constructed.

10. Location of layout to include position of the rig, mud tanks, reserve pits, burn pits, pipe rack, etc.

See map 2. The topography in the immediate vicinity of the well is flat. The drilling pad will not be compacted or surfaced.

11. Plans for restoration of the surface.

Upon completion of operations, the surface will be cleared of all junk, leveled and re-seeded.

12. Other information.

The topography of the general area is gently rolling. There is some grass but very little other vegetation. No cut and fill will be needed.
