13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Nerdlihc is currently experimenting with a new tubing heating system to eliminate paraffin build up problems associated with this field's Dakota production. Testing will be evaluated over the next three (3) months, whereafter the Dakota wells on this field will be upgraded sequentially.

It is anticipated that this well will be subject of the new installation with formation rejuvenation by February 1993.

We request that the status of this well be maintained as shut in until end of the proposed work-the end of February 1993.

THIS APPROVAL EXPIRES FEB 28 1993
