Spudded a 9" hole on the 6/15/79 and set 30' of 7" casing, displaced cement to surface and tested pipe by pressuring up to 800 P.S.I. with mud pump.

We do not intend to finish drilling this well in the near future. We found after testing Santa Fe #1, an offset well, that we have moved up structure and and are producing a small amount of oil and large amounts of gas. We will refile to drill at a later date for gas or shallow oil.
