Re: SFPRR #81, K-21-16N-6W

Dear Mr. Blanks:

We received a copy of the Administrative Order NSL-1663 for the referenced well. The footage is 1340 FSL and 1340 FWL. This does not match the footage on the APD, the plats or any other paperwork filed with our office. I called the Santa Fe office and they told me that was the footage asked for in the application.

One of the footages is wrong. We need to know which one. If it is the one in our files then a new plat and sundry with the correct footages must be filed. If it is the nonstandard application then a new application must be filed. Remember to send us a copy of any nonstandard or waterflood expansion applications.

Yours truly,

A handwritten signature in cursive script that reads "Jeff A. Edmister".
