*To* Jeff:

**CHARLES GHOLSON**  
*Deputy Inspector*

As you are aware, the Manvar Mining #1, located on the Lee Ranch North of San Mateo, has developed into a big mess and is getting worse daily. Livestock is bogging down and a large swamp is being created. I would like to replug the well on an emergency basis, as soon as possible. I have contacted two firms about contracting the work. Odeco Inc., says they can do it for under \$5,000. Trend Inc., says they can't do it for less than \$5,000.

Please let me know as soon as possible, if this will be approved as I would like to begin operations the first of next week.
