Re: State #29, G-28-20N-09W
State #32, A-29-20N-09W ✓

Dear Mr. Law:

I am returning the enclosed forms (C-103) on the referenced wells for the following reasons:

1. Spud reports should be separate from the drilling reports and completions reports.
2. Spud reports should show the date and time the wells were spudded.
3. Separate drilling reports (Form C-103) should be submitted, showing casing setting depth, amount and type of cement used, top of cement and method used to determine cement top.
4. Separate well completion reports (Form C-105) should be submitted, including summaries of all tests conducted on the wells and any electric or radio activity logs run on the wells.
5. Separate requests for allowable (Form C-104) should be submitted, completely filled out.

Please make the necessary corrections and file the additional forms needed for the assignment of allowables for the referenced wells.

Yours truly,

Carolyn J. Taplin
Field Representative
