8/8/97 Removed the fence from around the pit. Used the stockpiled dirt from the pit to fill the pit, which was partially full of cuttings, and to provide topsoil for recontouring the well pad, which was then reseeded, using Seed Mix No. 2, as specified in the APD. Levelled the access road and constructed the required barricade to prevent further entry. Wired the fence back shut between Sections 3 and 10, as the rancher had removed the wire gate that had been used to gain access during drilling. Thus, all restoration work has been completed, and the road and location will be ready for inspection after the seed has had an opportunity to germinate and grow.
