(Field)

Rio Arriba
(County or Subdivision)

New Mexico
(State or Territory)

Ground Level

The elevation of the ~~surface~~ above sea level is **7108** ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

A 12" hole will be drilled to approximately 200' and 8-5/8" O.D. 24# casing will be run and cemented with 200 sx. A 7-5/8" hole will be drilled to a total depth of approximately 3730' to test the Gallup formation. In the event commercial production is encountered in the Gallup formation production casing will be run and the well sand-water fractured, tubing run and the well completed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
