Attn: Ms. Alice Dugger

Dear Ms. Dugger:

Pursuant to Bob Bigbee's phone conversation with Mr. Charles Gholson on March 10, 1986, we are attaching revised GOR reports on the Dunn #2 Well, which are effective February 1, 1986. The well is currently being produced from the Graneros and Gallup formations and all future production will be reported on the same formula as the Dunn #9, #10, #11, and #12 as well as the State H#3 and H#4, i.e. 75% of the oil production to the Lybrook Gallup Oil Field and 25% to the Rio Arriba Undesignated Graneros Pool. The PBD of the well is currently at 6631 and the zones below this were plugged on May 22, 1984.

If you need any further information on this change, please let me know.

Very truly yours,

*Elizabeth B. Keeshan*
