Plug back

(Note: Report results of multiple completion on Well  
Completion or Recombination Report and Log form.)NEEDS PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details and give pertinent data, including estimated date of starting any  
proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent  
to the work.)

9/27/87 Arapahoe Drilling Company, Rig #7, phoned Frank Welker with Chace Oil Company at 10:00 P.M. Arapahoe gave notice that they were going to plug back the open hole from 934' KB to bottom of surface pipe set at 232' KB due to hole deviation exceeding drilling contract limit. Chace attempted to contact the BLM at 10:15 P.M. 9/27/87 but the line rang busy.

9/28/87 Set 1st cement plug from 934' KB to 585' KB with 100 sks (118 ft<sup>3</sup>) Class B Neat cement. Plug set at 3:55 A.M. 9/28/87. Second cement plug from 585' KB to 183' KB with 115 sks (136 ft<sup>3</sup>) Class B cement. Plug set at 4:30 A.M. 9/28/87. At 8:35 A.M., Chace again attempted to notify the BLM of the plug back and again the line rang busy.

On at least seven other attempts, Chace failed to reach the BLM due to a busy line.

I hereby certify that the foregoing is true and correct
