

780 - 800	100% Siltstone, light gray, shaly, carbonaceous, dense, tight.
800 - 900	100% Shale, gray, sandy, hard, slightly calcareous.
900 - 950	100% Siltstone, light gray, shaly, sandy, hard, dense, light.
950 - 1060	50% Siltstone, as above; 50% Shale, as above.
1060 - 1090	100% Siltstone, gray, "salt and pepper" sandy, calcareous, hard, dense, tight.
1090 - 1130	80% Shale, medium gray, sandy; 20% Siltstone, gray shaly, calcareous, dense.
1130 - 1210	100% Siltstone, light gray to white, "salt and pepper", sandy, argillaceous, dense, tight with thin, sandy shale partings.
1210 - 1290	50% Shale, gray, sandy, calcareous, slightly carbonaceous, hard, dense, sharp with thin stringers of calcareous Siltstone. 50% Siltstone, light gray, shaly, slightly bentonitic, dense, tight with microlaminations of Shale.
1290 - 1340	100% Siltstone, as above.
1340 - 1350	100% Shale, dark gray, silty, slightly carbonaceous with microlaminations of gray Siltstone.
1350 - 1360	100% Sandstone, white, "salt and pepper." glauconitic, fine to very fine grained, carbonaceous, with white clay matrix. Few spotty oil stains, dense, tight.
1360 - 1400	100% Shale, dark gray, sandy, slightly carbonaceous with microlamination of carbonaceous material.
1400 - 1480	100% Shale, as above.

T.D. 1487' in the middle shale member of the Mancos Formation.
