Re: Boling Federal #5 C-22-29N-3W

Gentlemen:

It is my understanding that the referenced disposal well had a leak in the wellhead rather than a casing failure and that it has been repaired. We have not received a sundry notice to this effect. I realize that the notice may have been filed with the BLM and perhaps it has got hung up there. At any rate, we must have a copy before we can approve of reinjection. Also, the well must have another positive pressure tests to prove mechanical integrity before begining injection. Please schedule the test as soon as possible. Notify this office at least 24 hours prior to test, so we may provide a witness.

If you have any questions, please contact me.

Yours truly,

A handwritten signature in cursive script that reads "Charles Gholson".
