

12 POINTS - DEVELOPMENT PLAN FOR SURFACE USE

Boling Federal 6-22
SE/NW Sec 22 T19N R3W
Sandoval Co., New Mexico
Media Dome Field

1. EXISTING ROAD

We have prepared and included a composite map from U.S.G.S. topographic maps (Aztec and Albuquerque).

Directions to location: Go to Cuba, N. Mexico on State route 44. From Cuba go in a southwesterly direction on State route 197 approximately 12 miles. 1/4 mile past Johnson Trading Post there is a lease access road to the left, or easterly direction. Location of this access road is marked by a lease sign on side of highway.

2. PLANNED ACCESS ROADS

We have prepared and included a lease map showing lease roads and surface production facilities, and wells in the area.

Lease roads will be of typical oil field construction:

Width sufficient for 1 vehicle to travel, and 2 vehicles to pass when meeting head-on. Material will be compacted dirt, with gravel where necessary.

Roads are crowned and bar-ditched for water run off.

3. LOCATION OF EXISTING WELLS

Shown on the before mentioned lease map.

4. LATERAL ROADS

Shown on the before mentioned lease map.

5. LOCATION TANK BATTERY AND FLOW LINES

Shown on the before mentioned lease map. Should production be obtained for this proposed well, we plan to submit a supplement plan to show facilities and flowlines.
