Dear Mr. Ramey:

This is a application on behalf of the above-referred-to Operator for administrative approval of an non-standard proration unit for the above-referred-to well.

Reference is made to Order R-5353-B and R-5353-B1, Special Rules and Regulations for the Chacon Dakota Associated Pool requiring that a standard oil proration unit shall be 160 acres and a standard gas proration unit shall be 320 acres.

The Chacon Jicarilla Apache "D" No. 103 is currently classified as a gas well. An acreage dedication of 320 acres would require that the N/2, Section 35-T23N-R3W be dedicated to the well. However, the Dave M. Thomas, Jr., Chacon Jicarilla Apache "D" No. 110, NE/4, Section 35-T23N-R3W, is classified as an oil well and requires a dedication of 160 acres.

Section B, Rule 5(b), of the Special Rules and Regulations, states that the simultaneous dedication of any acreage to an oil well and a gas well is prohibited. Therefore, the NE/4 Section 35-T23N-R3W, 160 acres, can only be dedicated to the above-referred-to well and would be considered a non-standard proration unit.

This application is being made as per Rule 4(b), of the Special Rules and Regulations, and your consideration and approval would be appreciated.
