17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We are negotiating with an operator who would like to deepen this hole to test the Chacra Gas Sand at about 1000'.

We set 110 feet of casing in the hope that we could eventually do this.

Originally we had a pit. When we changed from cable tools to AIR somebody filled the pit to get the bigger rig into position. We did not know that switching from dry air to FOAM would cause cuttings to move off our lease. Our previous experience with air drilling had been that cuttings offered very little problem and always stayed near the rig. Our plan to deepen has caused our delay to clean up.
